博士研究

博士题目：“面向车联网的移动云网络资源管理与优化研究”，来自“国家自然科学基金项目”

My research examined the use of ELW pulses from a mode-locked source array inducted through transuranic crystals to observe entanglement on supraquantum structures. Theoretical advancements included prediction of quantum resonance phenomena including the possibility of resonance cascades. I was motivated to conduct this doctoral research due to my passion for teleportation of matter and I believe I have laid the foundation for further experimental validation and development of practical outcomes.

项目经历

Current, from Jan 1995 (FT)

Black Mesa Research Facility Team Leader (Anomalous Materials)

As part of this promotion, I began conducting nuclear and subatomic research in the Anomalous Materials department. My team and I are particularly interested in dimensionality and its interaction with spacetime. The focus is on practical outcomes and applications in teleportation and communication with distal locations.

Feb 1991 -- Jan 1995 (FT)

Black Mesa Research Facility Level 3 Research Associate

This position involved transitioning from purely theoretical work to experimental applications utilising the immense resources of Black Mesa. The transition required an initial learning curve in hazard containment, health and safety procedures and operating experimental infrastructure. Manipulating valves, carts, buttons, levers, etc considerably increased my physical fitness.

Jul 1982 -- Dec 1984 (PT)

WashPests Limited Pest Control Technician

In this summer job I was tasked with helping eradicate pests from industrial areas. Work involved setting traps, spraying and physical eradication. I received praise for reaching difficult areas and my innovative use of a crowbar to assist in my work.

教育经历

2014 -- 2019 工学博士
智能计算与通信实验室
北京邮电大学

2010 -- 2014 工学学士
信息与通信工程学院
北京邮电大学

获奖情况

2017 国家奖学金
北京邮电大学智能计算与通信实验室

2018 第二届良飞奖
北京邮电大学智能计算与通信实验室

编程技能

精通 Python, Node.js
熟悉 C, C++, MATLAB, L^AT_EX
了解 Go, Rust

沟通

Posters Poster at the Meeting of the American Physical Society -- 1985

技能

Goal Oriented

I believe in action over long-winded discussions. I listen to everyone's viewpoints and use my judgement to immediately act based on consensus to achieve goals quickly and efficiently.

Physical Dexterity

Manual manipulation of experimental equipment and training within Black Mesa (e.g. the Hazard Course) have contributed to an enjoyment of working with my hands.

Passionate

I have been interested in theoretical physics such as quantum mechanics and relativity from an early age. My education and research have cemented this interest into a passion. I greatly enjoy carrying out fundamental physics research with potential practical applications.

DOCTORAL RESEARCH

“Research on Resource Management and Optimization of Mobile Cloud Networks for Internet of Vehicles”

My research examined the use of ELW pulses from a mode-locked source array inducted through transuranic crystals to observe entanglement on supraquantum structures. Theoretical advancements included prediction of quantum resonance phenomena including the possibility of resonance cascades. I was motivated to conduct this doctoral research due to my passion for teleportation of matter and I believe I have laid the foundation for further experimental validation and development of practical outcomes.

WORK EXPERIENCE

CURRENT, FROM JAN 1995 (FT)

Black Mesa Research Facility *Team Leader (Anomalous Materials)*

As part of this promotion, I began conducting nuclear and subatomic research in the Anomalous Materials department. My team and I are particularly interested in dimensionality and its interaction with space-time. The focus is on practical outcomes and applications in teleportation and communication with distal locations.

FEB 1991 – JAN 1995 (FT)

Black Mesa Research Facility *Level 3 Research Associate*

This position involved transitioning from purely theoretical work to experimental applications utilising the immense resources of Black Mesa. The transition required an initial learning curve in hazard containment, health and safety procedures and operating experimental infrastructure. Manipulating valves, carts, buttons, levers, etc considerably increased my physical fitness.

JUL 1982 – DEC 1984 (PT)

WashPests Limited *Pest Control Technician*

In this summer job I was tasked with helping eradicate pests from industrial areas. Work involved setting traps, spraying and physical eradication. I received praise for reaching difficult areas and my innovative use of a crowbar to assist in my work.

EDUCATION

- 1986 – 1990 **Doctor of Philosophy**
Theoretical Physics
Massachusetts Institute of Technology
- 1985 **Master of Science**
FIRST CLASS HONOURS
Theoretical Physics
Massachusetts Institute of Technology
- 1982 – 1984 **Bachelor of Physics**
Department of Physics
The University of Washington

AWARDS

- 1985 **Faculty of Science Masters Scholarship**
Massachusetts Institute of Technology
- 1983 **Top Achiever Award – Physics**
The University of Washington

COMPUTER SKILLS

- BEGINNER Java, MS DOS
- INTERMEDIATE Javascript, Python, HTML, CSS,
Microsoft Windows
Computer Hardware & Support
- EXPERT Perl, Unix, L^AT_EX

COMMUNICATION SKILLS

- CONFERENCES Oral Presentation at the Annual MIT
Theoretical Physics Conference – 1987
- POSTERS Poster at the Meeting of the American
Physical Society – 1985

SKILLS

Goal Oriented

I believe in action over long-winded discussions. I listen to everyone's viewpoints and use my judgement to immediately act based on consensus to achieve goals quickly and efficiently.

Physical Dexterity

Manual manipulation of experimental equipment and training within Black Mesa (e.g. the Hazard Course) have contributed to an enjoyment of working with my hands.

Passionate

I have been interested in theoretical physics such as quantum mechanics and relativity from an early age. My edu-

cation and research have cemented this interest into a passion. I greatly enjoy carrying out fundamental physics research with potential practical applications.
