博士研究

"面向车联网的移动云网络资源管理与优化研究"，来自 "国家自然科学基金项目"

My research examined the use of ELW pulses from a mode-locked source array inducted through transuranic crystals to observe entanglement on supraquantum structures. Theoretical advancements included prediction of quantum resonance phenomena including the possibility of resonance cascades. I was motivated to conduct this doctoral research due to my passion for teleportation of matter and I believe I have laid the foundation for further experimental validation and development of practical outcomes.

主要研究方向

物联网云平台
车联网

项目经历

(FT)

IEEE 802.11p 开发
Team Leader (Anomalous Materials)

As part of this promotion, I began conducting nuclear and subatomic research in the Anomalous Materials department. My team and I are particularly interested in dimensionality and its interaction with spacetime. The focus is on practical outcomes and applications in teleportation and communication with distal locations.

FEB 1991 – JAN 1995 (FT)

物联网云平台开发
Level 3 Research Associate

This position involved transitioning from purely theoretical work to experimental applications utilising the immense resources of Black Mesa. The transition required an initial learning curve in hazard containment, health and safety procedures and operating experimental infrastructure. Manipulating valves, carts, buttons, levers, etc considerably increased my physical fitness.

JUL 1982 – DEC 1984 (PT)

车联网资源分配算法研究
Pest Control Technician

In this summer job I was tasked with helping eradicate pests from industrial areas. Work involved setting traps, spraying and physical eradication. I received praise for reaching difficult areas and my innovative use of a crowbar to assist in my work.

已发表论文

1. Kan Zheng, **Lu Hou**, Hanling Meng, Qiang Zheng, Ning Lu, Lei Lei, "Soft-defined heterogeneous vehicular network: architecture and challenges," *IEEE Network*, vol. 30, no. 4, July 2016, pp. 72-80.(IF = 7.23)

教育经历

2014 – 2019	工学博士 智能计算与通信实验室 北京邮电大学
2010 – 2014	工学学士 信息与通信工程学院 北京邮电大学

获奖情况

2017	国家奖学金 北京邮电大学智能计算与通信实验室
2018	校基金 北京邮电大学智能计算与通信实验室
2018	第二届良飞奖 北京邮电大学智能计算与通信实验室

计算机技能

精通	Office,
熟悉	Linux,

编程技能

精通	Python🐍, Node.js⬡
熟悉	C, C++, MATLAB, LaTeX, SQL shell, HTML, Javascript, CSS
了解	Go, Rust, lisp, Java

沟通

POSTERS	Poster at the Meeting of the American Physical Society – 1985

技能

Goal Oriented

I believe in action over long-winded discussions. I listen to everyone's viewpoints and use my judgement to immediately act based on consensus to achieve goals quickly and efficiently.

Physical Dexterity

Manual manipulation of experimental equipment and training within Black Mesa (e.g. the Hazard Course) have contributed to an enjoyment of working with my hands.

Passionate

7. Xiong Xiong, **Lu Hou**, Long Zhao, "A Group-Based Massive Multiple Access Scheme in Cellular M2M Networks," *Computer Communications*, vol. 121, May. 2018, pp. 44-49. (IF = 3.338)

I have been interested in theoretical physics such as quantum mechanics and relativity from an early age. My education and research have cemented this interest into a passion. I greatly enjoy carrying out fundamental physics research with potential practical applications.
